OCT 2 1872 Around the World in Eighty Days

On this day in 1872 Phileas Fogg set out on his adventure to circumnavigate the world. Jules Verne's novel **Around the World in 80 Days** was published in 1873 and is one of his most popular works. Fogg accepts a wager of £20,000 that he can complete his round the world trip in 80 days and, accompanied by his valet Passepartout, the book describes his journey and trials.

The first tune is a jig version of an Irish reel which also goes under the name **The Sword in Hand**, although it probably stems from the Scottish tune **Hey the Bonnie Breastknots**. The reel has the alternative title **The Wise Maid**.
