

# Theory and Application

## Playing in Positions 3: Third Position

WRITTEN BY Pee Wee King with lyrics by Redd Stewart, *The Tennessee Waltz* has become one of the biggest selling country songs ever. This setting of the tune goes up to the dusty end of the fingerboard, up to the

high C (9th fret on the E string). The trick is to change your hand position when an open string is played. I have marked where you change from 1st to 3rd position and back again (always when an open string is played).
